DETAILED ACTION

Response to Arguments

The amendment received 7-9-04 overcomes the examiner's prior art rejection. Hence claims 1, 6-7 and 10-11 are allowed.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

- 1. The applicant has amended the independent claims with material that is novel, in the examiner's opinion, over the prior art cited.
- 2. Claim 1 novel material recites "wherein the network, when initiating the USSD transfers sends the mobile station an indication that the mobile station must initiate the call attempt and wherein the mobile station when initiating the call attempt calls a non-existent number or itself".
- 3. Claim 6 novel material recites "wherein the mobile station initiating the call attempt is adapted to receive an indication from a network that the mobile station must initiate the call attempt and wherein the mobile station is adapted to call a non-existent number or itself when initiating the call attempt".
- 4. Claim 7 novel material recites "wherein the second logic is adapted to initiate a call attempt by sending to the mobile station an indication that the mobile station must initiate the call attempt and wherein the mobile station is adapted to call a non-existent number or itself when initiating the call attempt".
- 5. The recitations above, along with the remaining portions of the independent claims render the material patentable in the examiner's opinion.
